

## COMPANY

**ZeMP Company** - we are a developing company that focuses on the production of PCV windows and exterior doors. We also offer energy-saving plastic windows, various window accessories, aluminum products, we make individual orders, tailored to customer needs.

**Modern Joinery** with PVC is currently more used than the wooden joinery. Its advantages are: tightness, protection space from dust, fumes, noise from the outside and aesthetics. The high durability of the joinery ensures that the joinery will be used for at least 50 years.

**Services** - we provide you transport of our products, throughout the Europe.  
Before each execution of external doors we prepare a draft for review and approval by the customer
